LCA CT – Clearly the Best Lice Treatment Option

January 11, 2016 / 0 Comments / in Uncategorized / by Lice Clinics of America Connecticut

Despite their tiny size, lice can quickly become a big problem no matter what season, how often you wash your hair, or even that you may be way past pigtails. Time is of the essence in treating lice before it gets worse or spreads to others and the more you know, the faster you can act! There are many options to explore, ranging from the very expensive or toxic to the very time consuming (and frustrating!). Thankfully, Lice Clinics of America provides families

throughout CT and MA with a fast, non-toxic, economical solution that's guaranteed to work. See how we compare to the other options...

GET THE FACTS

WHAT TREATMENT IS BEST?

Treatment Options	 LICE CLINICS OF AMERICA	Sklice (prescription)	Leading Over-the-Counter and Other Topical Products	Nit Picking and Combing
Treatments Required	1 treatment 3 steps utilizing the AirAllé® FDA-cleared medical device	1 Combing Required	3+ Combing required	3 to 4 Combing required. Any missed eggs or live bugs can lead to recurrence.
Toxins	none	Ivermectin, .5%	Permethrin, Benzyl Alcohol, Lindane, Malathion	none
Clinical Test Results	100% effective on both live lice and their nits/eggs when AirAllé® used in combination with dimethicone	76% in one study and 71% in another study for live lice only	20% to 86% for live lice only	none
Cost	\$195 Includes AirAllé® treatment, comb out, and dimethicone topical application	\$140 to \$310 Often not covered by insurance	\$20 per treatment. Often can require up to five treatments to be fully effective.	\$270 Average. \$90 per hour. Usually takes a minimum of 3 to 5 hours. Any missed eggs or live bugs can lead to recurrence.
Warnings	none	Consult your physician if you are pregnant or breastfeeding, have allergies or skin conditions. Can cause eye irritation or burning sensation on skin. Not to be used on children less than 6 months old. Effects of an overdose include rash, dizziness, vomiting, diarrhea, seizure, abdominal pain, ataxia and paresthesia, among others.	Flammability, age restrictions, seizures, death in infants, do not use if pregnant or breastfeeding	No warnings; but high likelihood of recurrence
